Care range

Animal hygiene

OUR BRAND

After several years of professional grooming and maintenance of domestic animals, Got Pets—certified breeders of dogs and cats in Morocco—decided to design their own professional brand to improve grooming performance for their own animals and to serve the local and international market of breeders and groomers waiting for high-performance exhibition products. The Got Pets range offers innovative scents with a long-lasting effect to keep the coat smooth and a pleasant scent for several days.

PRODUCT PRESENTATION

Pre wash

A nourishing treatment applied before shampooing to prepare the coat for washing. It hydrates, protects, and softens the hair to optimize the effectiveness of the shampoo.

Shampoo

A gentle shampoo for coat hygiene. Cleanses without irritating the skin. Respects the cutaneous (skin) balance. Suitable for regular use.

Blender

This accessory allows you to dilute your products to create a creamy foam ready to use. It facilitates the application of the treatment to the skin, reduces waste, and makes washing faster and more pleasant for your animal.

ACTIVE INGREDIENTS & BENEFITS

Sweet almond oil: nourishes and protects

Chamomile: soothes the skin

Aloe vera: hydrates and soothes

Glycerin: maintains hydration

ACTIVE INGREDIENTS & BENEFITS

Argan oil: rich in vitamin E, nourishes and regenerates, protects the coat
